

Remodeling a space?

We can help you redesign your room virtually.

You will need to measure and take pictures of your room. The image below is an example of the type of picture we need. It should show two to three walls, floor, and ceiling.

Tools needed: ■ measuring tape ■ paper and pencil ■ digital camera ■ a scanner and/or fax machine

With your pencil/ pen and paper, sketch a floor plan similar to the one below. Use your tape measure to measure the walls, windows, and furniture. Measure around the entire room. Measure the location of the windows. Include the height of the windows and ceiling as well. Once you indicate the measurements on the sketch, scan and email with the pictures to picts@ncinteriors.com.
